WHEREAS the Road video reference 2nd cited, the Board received a complaint on 02.07.2018 regarding illegal discharge of waste water from the industry, which is valid until 30.06.2021 for manufacturing Fabric Processing - 72.5 lakh per annum. The Board vide reference 3rd cited, the Board received a complaint on 22.07.2018 regarding illegal discharge of waste water from the industry, which is valid until 30.06.2021 for waste water from the industry, which is valid until 30.06.2021 for manufacturing Fabric Processing - 72.5 lakh per annum.

WHEREAS the Road video reference 3rd cited, the Board received a complaint on 22.07.2018 regarding illegal discharge of waste water from the industry, which is valid until 30.06.2021 for manufacturing Fabric Processing - 72.5 lakh per annum.

WHEREAS the Road video reference 4th cited, the Board received a complaint on 22.07.2018 regarding illegal discharge of waste water from the industry, which is valid until 30.06.2021 for manufacturing Fabric Processing - 72.5 lakh per annum.

WHEREAS the Road video reference 1st cited, the Board received a complaint on 22.07.2018 regarding illegal discharge of waste water from the industry, which is valid until 30.06.2021 for manufacturing Fabric Processing - 72.5 lakh per annum.

WHEREAS the Road video reference 5th cited, the Board received a complaint on 22.07.2018 regarding illegal discharge of waste water from the industry, which is valid until 30.06.2021 for manufacturing Fabric Processing - 72.5 lakh per annum.

WHEREAS the Road video reference 6th cited, the Board received a complaint on 22.07.2018 regarding illegal discharge of waste water from the industry, which is valid until 30.06.2021 for manufacturing Fabric Processing - 72.5 lakh per annum.

WHEREAS the Road video reference 7th cited, the Board received a complaint on 22.07.2018 regarding illegal discharge of waste water from the industry, which is valid until 30.06.2021 for manufacturing Fabric Processing - 72.5 lakh per annum.
leachate generated from waste storage facility are formed cess pool adjacent irrigational canal. The contaminated run-off observed to be discharged into irrigation canal, thereby indulging in illegal discharge of waste water/ contaminated run-off generated from the industry into irrigation canal.

6. The villagers has alleged contamination of bore wells all along the stretch of the canals passing to about 50 KM downstream, before joining into sea, due to discharges of waste water into canal and the same was observed during the inspection.

7. House keeping all around ETP & waste stacking areas are very poor and potential to cause contamination of run-off and discharging into irrigation canal abutting the industry premises.

8. Large extent of boiler ash was stacked openly and the non-suppressed dust emissions are causing air pollution problems in the surroundings.

9. The fugitive dust emissions emanating from open burning of non-hazardous solid waste behind compound wall of the industry is causing odour nuisance & air pollution problems in the surroundings.

WHEREAS vide reference 5th cited, the RO, Guntur issued Show Cause notice to the industry for non-compliance of consent conditions on 24.07.2018 and also mentioned that to remove immediately the unauthorized pipe lines laid into irrigation canal, to stop further discharges of waste water / contaminated run-off outside the industry premises, and to take necessary action for implementation of restorative measures to prevent spreading of pollutants along the stretch of the irrigation canal.

WHEREAS vide reference 6th cited, the EE, RO, Guntur has furnished inspection report to Board Office on 26.07.2018 and requested to review the industry before External Advisory Committee (Task Force).

WHEREAS vide reference 7th cited, the JCEE, ZO, Vijayawada has inspected the industry on 28.07.2018 & 08.08.2018 and furnished report to Board Office on 07.08.2018. It was observed that all the 5 pipelines connected to the Canal were dismantled and 5 nos. of pipeline discharge points were closed with concrete on the West Irrigation Canal. It was informed that 2 pipelines were connected for discharge of storm water from the industry.

WHEREAS legal hearing was conducted before the External Advisory Committee (Task Force) of A.P. Pollution Control Board in its meeting held on 08.08.2018. The representatives of the industry and Sri Annam Satish Prabhakar, Hon’ble MLC along with complainants from Pitalanavani Palem and surrounding villages attended the legal hearing and stated that the waste water generated from the industry was discharged into the irrigation canal through 5 No. of underground pipelines laid into Nizampatnam west irrigation canal. Further informed that effluents are being disposed by the industry occasionally to outside the premises through tankers during night times and the dust emanated from the boiler is causing severe air pollution problems from the above industry due to usage of paddy husk instead of coal. The representatives of the industry informed that they have provided ZLD system consisting of ETP, RO system, MEE and VTFD and the salts generated from the MEE are being disposed to TSDF, Visakhapatnam regularly. They are generating about 9.5-10 Tons of ETP sludge + MEE salts and incurring about 21.0 Lakhs every month for disposal of salts to TSDF. The underground pipelines to Nizampatnam west canal were existing prior to construction of the plant at the above site, to draw water from canal for agriculture activities and discharge of run-off from the agriculture fields. Out of the above, 2 pipelines were used to discharge only rain water run-off from the industry and they never indulged in discharge of waste water outside the premises. However, the pipelines were removed on receipt of the directions from the Board and the other 3 locations were sealed with cement plastering. With regard to emissions from the boiler, they are using only coal as fuel and the bag filters are provided to control emissions, which are being evaluated periodically to comply with emission standards. The committee noted the status of CFO consent conditions. The EE, RO, Guntur has informed that the industry was inspected on receipt of public complaints on illegal discharges through underground pipelines and notice was issued to prevent further discharge of contaminated run-off through pipe lines and other lapses observed during inspection. Further informed that the industry has removed 2 No. of pipelines and the other pipelines were plugged to prevent further discharges upon notice issued to the industry. Further, mentioned that the solid waste storage area is potential to cause contamination of rain water run-off, which need to upgraded to house the storage facility and the industry is needed to improve housekeeping and also suggested to provide guard pond for collection of run-off and to pump back to ETP for treatment and reuse within the premises.

After detailed review the committee recommended to issue the directions. The Board is hereby issue the following directions under Sec.33 (A) of Water (Prevention and Control of Pollution) Amendment Act, 1988 and under Sec.31 (A) of Air (Prevention & Control of Pollution) Amendment Act, 1987:
This Order comes into effect from today (ie. 14th Aug 2012) and will remain in full effect for a period of six months from the date of its promulgation. Any further orders, the interests of public health and environment. The Environmental Engineer, Regional Office, Central Office, Kerukawattane, MCL's, NELT, Yoddele, and any other official of the industry mentioned above, may further direct the order for the said purpose and any other official of the industry mentioned above.

CFO & HWA order obtained from the Board.
