The CFO and HWA order that the industry shall ensure continuous compliance of conditions outlined in the CIPs and HWA order.

1. The industry shall not discharge any effluent outside the premises.
2. The industry shall implement, by utilizing the tested effluent, treatments to ensure the effluent treatment plant (ETP) meets the specified standards.
3. The industry shall provide the internal roads to the precautionary measures with regard to the water intake.
4. The industry shall provide separate energy meters and shall maintain equipment in good working order.
5. The industry shall provide proper measures with regard to effluent.
6. The industry shall not discharge any effluent outside the premises to ensure the effluent treatment plant (ETP) is functioning as per the order.

Emphasis on improving and ensuring the quality of the effluent:

1. The industry shall ensure the quality of the effluent is maintained in a good working order.
2. The industry shall ensure the quality of the effluent is maintained in a good working order.
3. The industry shall ensure the quality of the effluent is maintained in a good working order.
4. The industry shall ensure the quality of the effluent is maintained in a good working order.
5. The industry shall ensure the quality of the effluent is maintained in a good working order.

Resolution of stop production order with the following conditions:

After careful consideration of material facts of the case, the board hereby issues the following conditions:

WHEREAS the reference to the order of the board, the industry has submitted with undertakings on the following aspects:

1. The industry has stopped operation of the boiler since the production order was issued by the board. The industry has replaced the damaged pipes in the boiler.
2. The industry has ensured the ETP is functioning as per the order.
3. The industry has provided measures to stop the discharge of effluent.
4. The industry has established the ETP and has ensured its proper functioning.
5. The industry has provided proper measures with regard to the water intake.

The board hereby orders that:

1. The industry shall ensure continuous compliance of conditions outlined in the CIPs and HWA order.
2. The industry shall implement, by utilizing the tested effluent, treatments to ensure the effluent treatment plant (ETP) meets the specified standards.
3. The industry shall provide the internal roads to the precautionary measures with regard to the water intake.
4. The industry shall provide separate energy meters and shall maintain equipment in good working order.
5. The industry shall provide proper measures with regard to effluent.
6. The industry shall not discharge any effluent outside the premises to ensure the effluent treatment plant (ETP) is functioning as per the order.

Emphasis on improving and ensuring the quality of the effluent:

1. The industry shall ensure the quality of the effluent is maintained in a good working order.
2. The industry shall ensure the quality of the effluent is maintained in a good working order.
3. The industry shall ensure the quality of the effluent is maintained in a good working order.
4. The industry shall ensure the quality of the effluent is maintained in a good working order.
5. The industry shall ensure the quality of the effluent is maintained in a good working order.

Resolution of stop production order with the following conditions:

After careful consideration of material facts of the case, the board hereby issues the following conditions:

WHEREAS the reference to the order of the board, the industry has submitted with undertakings on the following aspects:

1. The industry has stopped operation of the boiler since the production order was issued by the board. The industry has replaced the damaged pipes in the boiler.
2. The industry has ensured the ETP is functioning as per the order.
3. The industry has provided measures to stop the discharge of effluent.
4. The industry has established the ETP and has ensured its proper functioning.
5. The industry has provided proper measures with regard to the water intake.

The board hereby orders that:

1. The industry shall ensure continuous compliance of conditions outlined in the CIPs and HWA order.
2. The industry shall implement, by utilizing the tested effluent, treatments to ensure the effluent treatment plant (ETP) meets the specified standards.
3. The industry shall provide the internal roads to the precautionary measures with regard to the water intake.
4. The industry shall provide separate energy meters and shall maintain equipment in good working order.
5. The industry shall provide proper measures with regard to effluent.
6. The industry shall not discharge any effluent outside the premises to ensure the effluent treatment plant (ETP) is functioning as per the order.

Emphasis on improving and ensuring the quality of the effluent:

1. The industry shall ensure the quality of the effluent is maintained in a good working order.
2. The industry shall ensure the quality of the effluent is maintained in a good working order.
3. The industry shall ensure the quality of the effluent is maintained in a good working order.
4. The industry shall ensure the quality of the effluent is maintained in a good working order.
5. The industry shall ensure the quality of the effluent is maintained in a good working order.

Resolution of stop production order with the following conditions:

After careful consideration of material facts of the case, the board hereby issues the following conditions:

WHEREAS the reference to the order of the board, the industry has submitted with undertakings on the following aspects:

1. The industry has stopped operation of the boiler since the production order was issued by the board. The industry has replaced the damaged pipes in the boiler.
2. The industry has ensured the ETP is functioning as per the order.
3. The industry has provided measures to stop the discharge of effluent.
4. The industry has established the ETP and has ensured its proper functioning.
5. The industry has provided proper measures with regard to the water intake.

The board hereby orders that:

1. The industry shall ensure continuous compliance of conditions outlined in the CIPs and HWA order.
2. The industry shall implement, by utilizing the tested effluent, treatments to ensure the effluent treatment plant (ETP) meets the specified standards.
3. The industry shall provide the internal roads to the precautionary measures with regard to the water intake.
