During re-inspection, the facility was deemed to provide water sampling at different points,
1. The Joint Chief Environmental Engineer, Regional Office, is hereby charged with the responsibility of preparing the Draft Environmental Impact Statement (EIS) for the proposed power distribution project. The EIS will be submitted to the Federal Energy Regulatory Commission (FERC) for approval.

2. The EIS will be prepared by a team of environmental engineers and scientists. The team will conduct site visits, gather data, and analyze the potential impacts of the project on the environment. The EIS will include information on the project's design, construction, and operation.

3. The EIS will be reviewed by FERC and other federal, state, and local agencies. The review process will last several months and may involve public hearings and comment periods.

4. After the review process is complete, FERC will issue a Decision Document that includes their decision on whether to approve the project.

5. If approved, the project will proceed with construction. If denied, the project will be cancelled.

6. The EIS will be made available to the public for review and comment. The public will have the opportunity to submit comments and questions to FERC.

7. The EIS will be updated and revised as necessary during the project's design and construction phase.

8. The project will be constructed and operated in compliance with all federal, state, and local environmental regulations.

9. The project will include measures to minimize and mitigate environmental impacts, such as the use of renewable energy sources, energy-efficient equipment, and pollution control systems.

10. The project will be monitored and evaluated to ensure compliance with environmental regulations and to identify and address any environmental issues that may arise during the project's operation.

11. The project will include a comprehensive contingency plan to address any environmental emergencies that may occur during the project's operation.

12. The project will be reviewed annually to ensure compliance with environmental regulations and to identify and address any environmental issues that may arise during the project's operation.

13. The project will be closed and remediated at the end of its operational life.

14. The project will be reviewed by FERC and other federal, state, and local agencies to ensure that it has met all environmental regulations and to assess its impact on the environment.
This Order comes into effect from today i.e., 30.05.2018

Under Section 3(2) of the Pollution Control Board (Amendment) Act, 1987, the Chairperson and Control of Pollution (Amendment) Act, 1988, and under Section 3(1) of the Prevention and Control of Pollution Act, 1976, the Central Power Distribution Company of India (C.P.D.C) is empowered to serve a notice on the concerned Power Distribution Company to disconnect the power supply to the said establishment. The Power Distribution Company is hereby directed to disconnect the power supply to the said establishment forthwith and submit a report of action taken.

Chairman.

Order No. 173/APP/681/17/ALP/2018-19 dated 06.05.2018
