### Minutes of the CFE Committee Meeting Held on 21.06.2019 at 11.00 AM

#### Special Conditions

1. M/s. Sai Srujana Hatchery (Unit-II) is proposed to establish a hatchery at Sy.No.152/1,152/2, Vilukanipalli (V), Thotapalli Gudur (M), SPSR Nellore district.

2. The hatchery unit is surrounded by North: A.K. Peta village road; South: Vacant land & aqua pond; East: A.K. peta village road followed by agriculture land and West: Agriculture land and aqua ponds.

3. The hatchery is just abutting A.K. Peta village habitation, which is located towards North side.

4. The hatchery has proposed to provide ETP which consists of Collection tank, Chlorination tank, De-Chlorination tank for treating waste water generated from hatchery before being discharged into the drain which finally joins into the sea after passing In between agriculture lands.

5. The hatchery proposed to install D.G set of 1x 60 KVA with Acoustic enclosures.

#### Recommendations

After consideration of above said material facts, the committee recommended to reject the CFE application of the Hatchery in view of the proximity to the village habitation and the hatchery is proposed to discharge the treated water into nearby drain instead of discharging into Bay of Bengal. The hatchery waste water may pose the contamination of the ground water & canal water due to discharge of hatchery saline water into drains and also there is every possibility of damaging of abutting agriculture crops due to usage of canal/drain water.
